SILK PEEL DERMALINFUSION INSTRUCTIONS

www.SilkPeel.com

PEEL: PRE CARE

- Discontinue the use manual scrubs and prescription strength Retinoids (Retin A, Renova, Refissa, etc.) 7 days prior to treatment.
- Do not wax the area to be treated 72 hours before treatment.

PEEL: POST CARE

- Your skin may be slightly pink or red after your silk peel. This is normal and usually resolves within 24-48 hours.
- On occasion, patients may have flaky skin after having a Silk Peel. This is normal and usually resolves itself within 5 days.
- Please **do not** pick at exfoliating skin, let it come off of the skin naturally
- Please avoid waxing for 7 days and shaving for 2 days after a Silk Peel.
- Please do not use Retinols or Alpha Hydroxy Acids on your skin for 7 days after your Silk Peel.
- Please do not use scrubs on your skin for 7 days after your Silk Peel.
- You can continue to use your normal cleanser and skin care products unless otherwise directed, with the exception of the products listed above.
- No heavy foundation for 24 hours after treatment. Powder can be applied 4 hours after your procedure.
- Please call The Skin Suite with any questions regarding your treatment.
312.202.0882
- You may schedule your next Silk Peel treatment in 4 weeks.
